

# JK-U60

Ultrasonic lace machine

# JOCKY

## Features

1. New type intellectual ultrasonic generator with 20KHz transducer.
2. 3 grades of adjustable ultrasonic power to suit different materials
3. With auto frequency chasing system and soft-start technology
4. Rollers with various pattern designs are available
5. Easier operation and faster speed than regular sewing machine.
6. Capable of seaming, edge trimming, holing, and embossing.

## Technical Specification

Model	JK-U60
Roller size	Width of 60mm, diameter of 50-60mm
Input power	1500W-2500W 3 grades adjustable
Output frequency	20KHZ
Working speed	0-20m per min
Working temperature	≤25° C
Packing size	120x60x120cm
Weight(G.W/N.W)	110/90 kgs
